

BRIGGEMAN ENGINEERING

**Engineering Excellence
Dependable Timelines
Quality Assurance**

ISO 9001:2015
QUALITY MANAGEMENT SYSTEM

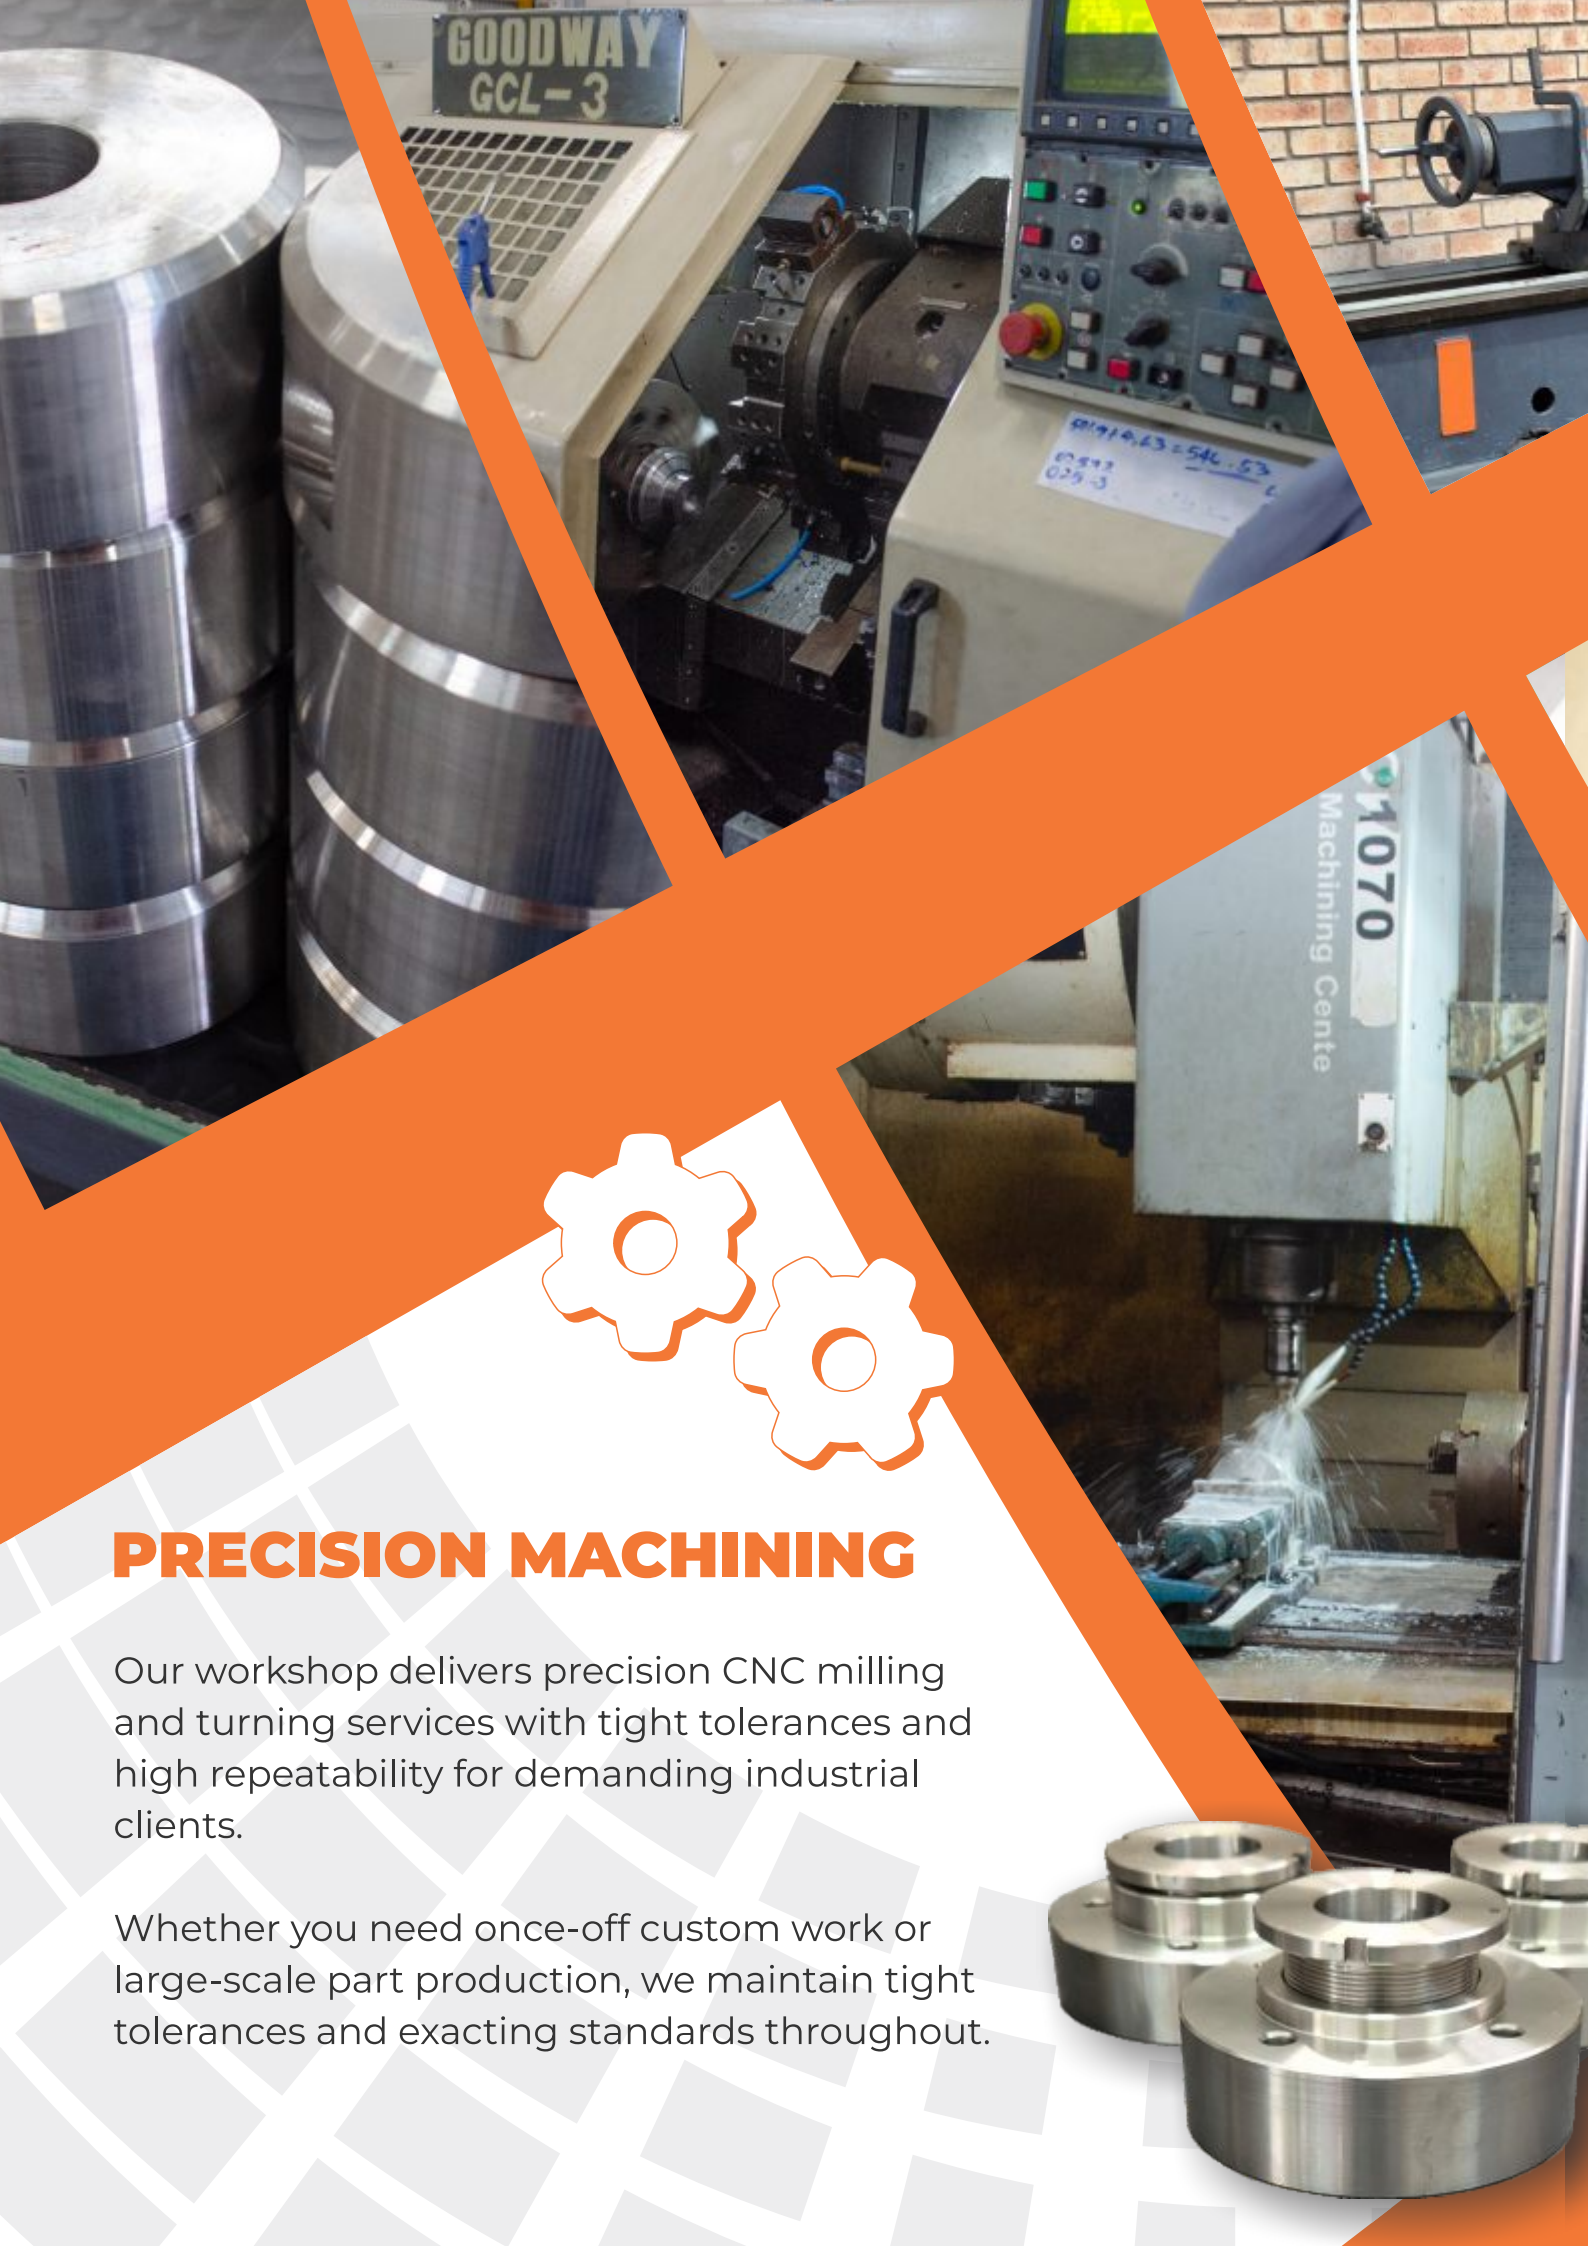

DELIVERING PRECISION

We deliver precise, reliable, and scalable engineering solutions from our Durban-based facility. With decades of industry experience and advanced machinery, we serve clients across mining, ports, automotive, and heavy industry.

**PRECISION
ENGINEERING,
MACHINING &
FABRICATION
SOLUTIONS**

PRECISION MACHINING

Our workshop delivers precision CNC milling and turning services with tight tolerances and high repeatability for demanding industrial clients.

Whether you need once-off custom work or large-scale part production, we maintain tight tolerances and exacting standards throughout.

MACHINING CAPABILITIES

- > CNC, VMC, and Lathe machining
- > Tight tolerances and repeatable output
- > Drilling, milling, and turning for all volumes

We specialize in high-accuracy manufacturing for industrial components, from once-off custom parts to full-scale production.

FABRICATION

We offer MIG, TIG, and ARC welding, full design and fabrication of steel structures, and high-quality metalwork to meet your industrial and commercial project needs.

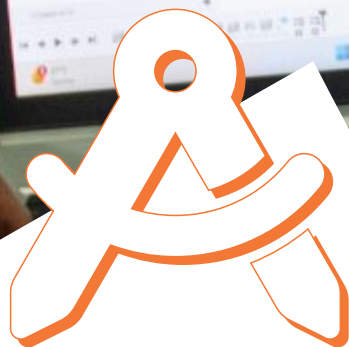

> MIG, TIG, and ARC welding

> Sheet metal work and structural assemblies

> Full inspection and quality control systems

concepts bef
production.

PROTOTYPING & DESIGN

From concept to prototype, we turn your designs into reality with expert engineering and precision prototyping services. Our prototyping service transforms ideas into testable, tangible parts.

inventors, startups,
firms looking to test
parts or industrial
before large-scale

- Full CAD design support
- Custom manufacturing for pre-production and concept validation
- Small-run builds for new product development

MAINTENANCE & REPAIRS

Briggeman Engineering specializes in restoring, rebuilding, and replacing hard-to-source or discontinued parts for industrial machinery and systems.

- Precision machining of worn or damaged parts
- Emergency breakdown machining and fast-turnaround repairs
- Maintenance support for ports, factories, and heavy machinery
- Reverse engineering for legacy components

TRUSTED ACROSS KEY INDUSTRIES

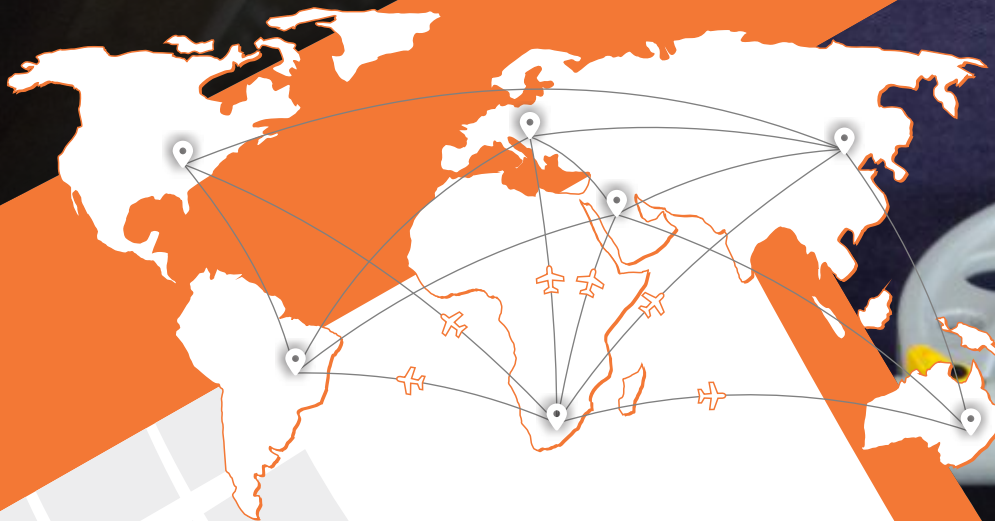

- > **Ports:** Winch components, docking gear, structural fittings
- > **Mining:** Wear-resistant parts, rugged repairs, shaft work
- > **Automotive:** Custom builds, prototype testing, one-off parts
- > **Steel Fabrication:** Support assemblies, plates, flanges
- > **Heavy Machinery:** Large-scale parts, repairs, and modifications

Our solutions support critical sectors where performance and precision are non-negotiable.

We pride ourselves
to be the best in our
field and provide the
best customer
service possible.
